I. Introduction

A. Context of the consultation

Over the last two decades, digital technology and the Internet have reshaped the ways in which content is created, distributed, and accessed. New opportunities have materialised for those that create and produce content (e.g. a film, a novel, a song), for new and existing distribution platforms, for institutions such as libraries, for activities such as research and for citizens who now expect to be able to access content – for information, education or entertainment purposes – regardless of geographical borders.

This new environment also presents challenges. One of them is for the market to continue to adapt to new forms of distribution and use. Another one is for the legislator to ensure that the system of rights, limitations to rights and enforcement remains appropriate and is adapted to the new environment. This consultation focuses on the second of these challenges: ensuring that the EU copyright regulatory framework stays fit for purpose in the digital environment to support creation and innovation, tap the full potential of the Single Market, foster growth and investment in our economy and promote cultural diversity.

In its "Communication on Content in the Digital Single Market"¹ the Commission set out two parallel tracks of action: on the one hand, to complete its on-going effort to review and to modernise the EU copyright legislative framework²³ with a view to a decision in 2014 on whether to table legislative reform proposals, and on the other, to facilitate practical industry-led solutions through the stakeholder dialogue "Licences for Europe" on issues on which rapid progress was deemed necessary and possible.

The "Licences for Europe" process has been finalised now⁴. The Commission welcomes the practical solutions stakeholders have put forward in this context and will monitor their progress. Pledges have been made by stakeholders in all four Working Groups (cross border portability of services, user-generated content, audiovisual and film heritage and text and data mining). Taken together, the Commission expects these pledges to be a further step in making the user environment easier in many different situations. The Commission also takes note of the fact that two groups – user-generated content and text and data mining – did not reach consensus among participating stakeholders on either the problems to be addressed or on the results. The discussions and results of "Licences for Europe" will be also taken into account in the context of the review of the legislative framework.

As part of the review process, the Commission is now launching a public consultation on issues identified in the Communication on Content in the Digital Single Market, i.e.: *"territoriality in the Internal Market, harmonisation, limitations and exceptions to copyright in the digital age; fragmentation of the EU copyright market; and how to improve the effectiveness and efficiency of enforcement while underpinning its legitimacy in the wider context of copyright reform"*. As highlighted in the October 2013 European Council

¹ COM (2012)789 final, 18/12/2012.

² As announced in the Intellectual Property Strategy ' A single market for Intellectual Property Rights: COM (2011)287 final, 24/05/2011.

³ *"Based on market studies and impact assessment and legal drafting work"* as announced in the Communication (2012)789.

⁴ See the document "Licences for Europe – ten pledges to bring more content online": http://ec.europa.eu/internal_market/copyright/docs/licences-for-europe/131113_ten-pledges_en.pdf.

Conclusions⁵ "Providing digital services and content across the single market requires the establishment of a copyright regime for the digital age. The Commission will therefore complete its on-going review of the EU copyright framework in spring 2014. It is important to modernise Europe's copyright regime and facilitate licensing, while ensuring a high level protection of intellectual property rights and taking into account cultural diversity".

This consultation builds on previous consultations and public hearings, in particular those on the "Green Paper on copyright in the knowledge economy"⁶, the "Green Paper on the online distribution of audiovisual works"⁷ and "Content Online"⁸. These consultations provided valuable feedback from stakeholders on a number of questions, on issues as diverse as the territoriality of copyright and possible ways to overcome territoriality, exceptions related to the online dissemination of knowledge, and rightholders' remuneration, particularly in the audiovisual sector. Views were expressed by stakeholders representing all stages in the value chain, including right holders, distributors, consumers, and academics. The questions elicited widely diverging views on the best way to proceed. The "Green Paper on Copyright in the Knowledge Economy" was followed up by a Communication. The replies to the "Green Paper on the online distribution of audiovisual works" have fed into subsequent discussions on the Collective Rights Management Directive and into the current review process.

B. How to submit replies to this questionnaire

You are kindly asked to send your replies **by 5 February 2014** in a MS Word, PDF or OpenDocument format to the following e-mail address of DG Internal Market and Services: **markt-copyright-consultation@ec.europa.eu**. Please note that replies sent after that date will not be taken into account.

This consultation is addressed to different categories of stakeholders. To the extent possible, the questions indicate the category/ies of respondents most likely to be concerned by them (annotation in brackets, before the actual question). Respondents should nevertheless feel free to reply to any/all of the questions. Also, please note that, apart from the question concerning the identification of the respondent, none of the questions is obligatory. Replies containing answers only to part of the questions will be also accepted.

You are requested to provide your answers directly within this consultation document. For the "Yes/No/No opinion" questions please put the selected answer in **bold** and underline it so it is easy for us to see your selection.

In your answers to the questions, you are invited to refer to the situation in EU Member States. ***You are also invited in particular to indicate, where relevant, what would be the impact of options you put forward in terms of costs, opportunities and revenues.***

The public consultation is available in English. Responses may, however, be sent in any of the 24 official languages of the EU.

C. Confidentiality

The contributions received in this round of consultation as well as a summary report presenting the responses in a statistical and aggregated form will be published on the website of DG MARKT.

⁵ EUCO 169/13, 24/25 October 2013.

⁶ COM(2008) 466/3, http://ec.europa.eu/internal_market/copyright/copyright-info/index_en.htm#maincontentSec2.

⁷ COM(2011) 427 final, http://ec.europa.eu/internal_market/consultations/2011/audiovisual_en.htm.

⁸ http://ec.europa.eu/internal_market/consultations/2009/content_online_en.htm.

Please note that all contributions received will be published together with the identity of the contributor, unless the contributor objects to the publication of their personal data on the grounds that such publication would harm his or her legitimate interests. In this case, the contribution will be published in anonymous form upon the contributor's explicit request. Otherwise the contribution will not be published nor will its content be reflected in the summary report.

Please read our [Privacy statement](#).

PLEASE IDENTIFY YOURSELF:

In the interests of transparency, organisations (including, for example, NGOs, trade associations and commercial enterprises) are invited to provide the public with relevant information about themselves by registering in the Interest Representative Register and subscribing to its Code of Conduct.

- If you are a Registered organisation, please indicate your Register ID number below. Your contribution will then be considered as representing the views of your organisation.

ID number: 626116910064-95.....

.....

- If your organisation is not registered, you have the opportunity to [register now](#). Responses from organisations not registered will be published separately.

If you would like to submit your reply on an anonymous basis please indicate it below by underlining the following answer:

- Yes, I would like to submit my reply on an anonymous basis

TYPE OF RESPONDENT (Please underline the appropriate):

€ **End user/consumer** (e.g. internet user, reader, subscriber to music or audiovisual service, researcher, student) **OR Representative of end users/consumers**

→ for the purposes of this questionnaire normally referred to in questions as "**end users/consumers**"

€ **Institutional user** (e.g. school, university, research centre, library, archive) **OR Representative of institutional users**

→ for the purposes of this questionnaire normally referred to in questions as "**institutional users**"

€ **Author/Performer OR Representative of authors/performers**

€ **Publisher/Producer/Broadcaster OR Representative of publishers/producers/broadcasters**

→ the two above categories are, for the purposes of this questionnaire, normally referred to in questions as "**right holders**"

X Intermediary/Distributor/Other service provider (e.g. online music or audiovisual service, games platform, social media, search engine, ICT industry) **OR Representative of intermediaries/distributors/other service providers**

→ for the purposes of this questionnaire normally referred to in questions as "**service providers**"

€ **Collective Management Organisation**

€ **Public authority**

€ **Member State**

€ **Other** (Please explain):

.....
.....

II. Rights and the functioning of the Single Market

A. *Why is it not possible to access many online content services from anywhere in Europe?*

[The territorial scope of the rights involved in digital transmissions and the segmentation of the market through licensing agreements]

Holders of copyright and related rights – e.g. writers, singers, musicians - do not enjoy a single protection in the EU. Instead, they are protected on the basis of a bundle of national rights in each Member State. Those rights have been largely harmonised by the existing EU Directives. However, differences remain and the geographical scope of the rights is limited to the territory of the Member State granting them. Copyright is thus territorial in the sense that rights are acquired and enforced on a country-by-country basis under national law⁹.

The dissemination of copyright-protected content on the Internet – e.g. by a music streaming service, or by an online e-book seller – therefore requires, in principle, an authorisation for each national territory in which the content is communicated to the public. Rightholders are, of course, in a position to grant a multi-territorial or pan-European licence, such that content services can be provided in several Member States and across borders. A number of steps have been taken at EU level to facilitate multi-territorial licences: the proposal for a Directive on Collective Rights Management¹⁰ should significantly facilitate the delivery of multi-territorial licences in musical works for online services¹¹; the structured stakeholder dialogue “Licences for Europe”¹² and market-led developments such as the on-going work in the Linked Content Coalition¹³.

"Licences for Europe" addressed in particular the specific issue of cross-border portability, i.e. the ability of consumers having subscribed to online services in their Member State to keep accessing them when travelling temporarily to other Member States. As a result, representatives of the audio-visual sector issued a joint statement affirming their commitment to continue working towards the further development of cross-border portability¹⁴.

Despite progress, there are continued problems with the cross-border provision of, and access to, services. These problems are most obvious to consumers wanting to access services that are made available in Member States other than the one in which they live. Not all online services are available in all Member States and consumers face problems when trying to access such services across borders. In some instances, even if the “same” service is available in all Member States, consumers cannot access the service across borders (they can only access their “national” service, and if they try to access the "same" service in another Member State they are redirected to the one designated for their country of residence).

⁹ This principle has been confirmed by the Court of justice on several occasions.

¹⁰ Proposal for a Directive of the European Parliament and of the Council of 11 July 2012 on collective management of copyright and related rights and multi-territorial licensing of rights in musical works for online uses in the internal market, COM(2012) 372 final.

¹¹ Collective Management Organisations play a significant role in the management of online rights for musical works in contrast to the situation where online rights are licensed directly by right holders such as film or record producers or by newspaper or book publishers.

¹² You can find more information on the following website: <http://ec.europa.eu/licences-for-europe-dialogue/>.

¹³ You can find more information on the following website: <http://www.linkedcontentcoalition.org/>.

¹⁴ See the document “Licences for Europe – ten pledges to bring more content online”:
http://ec.europa.eu/internal_market/copyright/docs/licences-for-europe/131113_ten-pledges_en.pdf.

This situation may in part stem from the territoriality of rights and difficulties associated with the clearing of rights in different territories. Contractual clauses in licensing agreements between right holders and distributors and/or between distributors and end users may also be at the origin of some of the problems (denial of access, redirection).

The main issue at stake here is, therefore, whether further measures (legislative or non-legislative, including market-led solutions) need to be taken at EU level in the medium term¹⁵ to increase the cross-border availability of content services in the Single Market, while ensuring an adequate level of protection for right holders.

1. [In particular if you are an end user/consumer:] Have you faced problems when trying to access online services in an EU Member State other than the one in which you live?

YES - Please provide examples indicating the Member State, the sector and the type of content concerned (e.g. premium content such as certain films and TV series, audio-visual content in general, music, e-books, magazines, journals and newspapers, games, applications and other software)

.....
.....

NO

Europa Distribution: We don't feel there is an important demand to have access to film through the national access when abroad. Nonetheless, regarding films, the potential interest could be resolved through portability.

NO OPINION

2. [In particular if you are a service provider:] Have you faced problems when seeking to provide online services across borders in the EU?

YES - Please explain whether such problems, in your experience, are related to copyright or to other issues (e.g. business decisions relating to the cost of providing services across borders, compliance with other laws such as consumer protection)? Please provide examples indicating the Member State, the sector and the type of content concerned (e.g. premium content such as certain films and TV series, audio-visual content in general, music, e-books, magazines, journals and newspapers, games, applications and other software).

.....
.....

NO

Europa Distribution: A distributor releases its films on his own territory, the one he has an expertise on and the rights for. For example, even on the Benelux territories, when there is often one distributor having the rights for the 3 countries, it is a Belgian team that will work on the Belgian release (theatrical, dvd, vod, tv), and a Dutch one for the Netherlands. In this case, where a distributor could provide online services across his borders, he will let the local

¹⁵ For possible long term measures such as the establishment of a European Copyright Code (establishing a single title) see section VII of this consultation document.

office deal with it, because of its expertise on such things as editorial preferences, kind of promotion, programming, etc

NO OPINION

3. [In particular if you are a right holder or a collective management organisation:] How often are you asked to grant multi-territorial licences? Please indicate, if possible, the number of requests per year and provide examples indicating the Member State, the sector and the type of content concerned.

[Open question]

Europa Distribution: In film distribution, for example, the Benelux territories ask for multi-territorial licenses but may then internally have sub-contracting licenses per territory, each territory has then its own local release, made by a local team with expertise on the local market (consumers, exhibitors, platforms, televisions, medias,...).

4. If you have identified problems in the answers to any of the questions above – what would be the best way to tackle them?

[Open question]

.....
.....

5. [In particular if you are a right holder or a collective management organisation:] Are there reasons why, even in cases where you hold all the necessary rights for all the territories in question, you would still find it necessary or justified to impose territorial restrictions on a service provider (in order, for instance, to ensure that access to certain content is not possible in certain European countries)?

YES – Please explain by giving examples

Europa Distribution: In distribution, the release date is very important. This date may change from a territory to another one, just because of competition with other titles (and some may be national titles, with only a local release because lack of interest elsewhere), holidays, etc. Typically a children movie will have a different release date because of the holidays: outside this date, the public for the film would be less available, at school....

As it is important to respect the media chronology (different windows for the release on different supports), the theatrical date has an effect on the release date on the other supports.

What is certain is that a distributor having the rights for a title on his territory will try to exploit them as much as possible. If the film isn't on a support, it will probably be because of a lack of interest from the public... Nowadays, another problem could be the cost to put a film online regarding the revenues one may expect. In some very small territories and for "niche" movies, those costs may be higher than the revenues (we can provide figures if you need some)

Moreover, for a same movie, the release date in one country has an impact on the other European countries: if the film is available online in one country but that the theatrical release in another country has not taken place yet, it may damage badly the theatrical release in this

second country. This is why it is justified to impose territorial restrictions on a service provider to restrict access to content from country to country.

.....
.....
NO

NO OPINION

6. [In particular if you are e.g. a broadcaster or a service provider:] Are there reasons why, even in cases where you have acquired all the necessary rights for all the territories in question, you would still find it necessary or justified to impose territorial restrictions on the service recipient (in order for instance, to redirect the consumer to a different website than the one he is trying to access)?

YES – Please explain by giving examples

.....
.....
NO

Europa Distribution: A distributor won't impose by his own restrictions to the exploitation of a title on the territory he has the rights for, it would be against his own interest. Most of the time, if a film is not shown on a support, it is because there is no interest from the same support/ the public OR it is economically not viable. For example, the costs to put a film on vod can sometimes be higher than the revenues expected on certain titles, on this support in a given territory (cfr supra)

NO OPINION

7. Do you think that further measures (legislative or non-legislative, including market-led solutions) are needed at EU level to increase the cross-border availability of content services in the Single Market, while ensuring an adequate level of protection for right holders?

YES – Please explain

Europa Distribution: we were part of the Licenses for Europe discussions and believe that regarding films, portability could be an interesting answer to cross border availability within the current legal scheme and without putting in danger the distributions houses. It is very important that it respects the territoriality of rights.

All in all we believe that market-led solutions can always be found.

.....

NO – Please explain

.....
.....
NO OPINION

B. Is there a need for more clarity as regards the scope of what needs to be authorised (or not) in digital transmissions?

[The definition of the rights involved in digital transmissions]

The EU framework for the protection of copyright and related rights in the digital environment is largely established by Directive 2001/29/EC¹⁶ on the harmonisation of certain aspects of copyright and related rights in the information society. Other EU directives in this field that are relevant in the online environment are those relating to the protection of software¹⁷ and databases¹⁸.

Directive 2001/29/EC harmonises the rights of authors and neighbouring rightholders¹⁹ which are essential for the transmission of digital copies of works (e.g. an e-book) and other protected subject matter (e.g. a record in a MP3 format) over the internet or similar digital networks.

The most relevant rights for digital transmissions are the reproduction right, i.e. the right to authorise or prohibit the making of copies²⁰, (notably relevant at the start of the transmission – e.g. the uploading of a digital copy of a work to a server in view of making it available – and at the users’ end – e.g. when a user downloads a digital copy of a work) and the communication to the public/making available right, i.e. the rights to authorise or prohibit the dissemination of the works in digital networks²¹. These rights are intrinsically linked in digital transmissions and both need to be cleared.

1. The act of “making available”

Directive 2001/29/EC specifies neither what is covered by the making available right (e.g. the upload, the accessibility by the public, the actual reception by the public) nor where the act of “making available” takes place. This does not raise questions if the act is limited to a single territory. Questions arise however when the transmission covers several territories and rights need to be cleared (does the act of “making available” happen in the country of the upload only? in each of the countries where the content is potentially accessible? in each of the countries where the content is effectively accessed?). The most recent case law of the Court of Justice of the European Union (CJEU) suggests that a relevant criterion is the “targeting” of a certain Member State’s public²². According to this approach the copyright-relevant act (which has to be licensed) occurs at least in those countries which are “targeted” by the online

¹⁶ Directive 2001/29/EC of the European Parliament and of the Council of 22 May 2001 on the harmonisation of certain aspects of copyright and related rights in the information society.

¹⁷ Directive 2009/24/EC of the European Parliament and of the Council of 23 April 2009 on the legal protection of computer programs.

¹⁸ Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases.

¹⁹ Film and record producers, performers and broadcasters are holders of so-called “neighbouring rights” in, respectively, their films, records, performances and broadcast. Authors’ content protected by copyright is referred to as a “work” or “works”, while content protected by neighbouring rights is referred to as “other subject matter”.

²⁰ The right to “authorise or prohibit direct or indirect, temporary or permanent reproduction by any means and in any form, in whole or in part” (see Art. 2 of Directive 2001/29/EC) although temporary acts of reproduction of a transient or incidental nature are, under certain conditions, excluded (see art. 5(1) of Directive 2001/29/EC).

²¹ The right to authorise or prohibit any communication to the public by wire or wireless means and to authorise or prohibit the making available to the public “on demand” (see Art. 3 of Directive 2001/29/EC).

²² See in particular Case C-173/11 (Football Dataco vs Sportradar) and Case C-5/11 (Donner) for copyright and related rights, and Case C-324/09 (L’Oréal vs eBay) for trademarks. With regard to jurisdiction see also joined Cases C-585/08 and C-144/09 (Pammer and Hotel Alpenhof) and pending Case C-441/13 (Pez Hejduk); see however, adopting a different approach, Case C-170/12 (Pinckney vs KDG Mediatech).

service provider. A service provider “targets” a group of customers residing in a specific country when it directs its activity to that group, e.g. via advertisement, promotions, a language or a currency specifically targeted at that group.

8. Is the scope of the “making available” right in cross-border situations – i.e. when content is disseminated across borders – sufficiently clear?

YES

NO – Please explain how this could be clarified and what type of clarification would be required (e.g. as in "targeting" approach explained above, as in "country of origin" approach²³)

.....
.....

NO OPINION

9. [In particular if you are a right holder:] Could a clarification of the territorial scope of the “making available” right have an effect on the recognition of your rights (e.g. whether you are considered to be an author or not, whether you are considered to have transferred your rights or not), on your remuneration, or on the enforcement of rights (including the availability of injunctive relief²⁴)?

YES – Please explain how such potential effects could be addressed

Europa Distribution: It is important for a distributor to have a clear view on the rights he will own on a given title, a given territory(ies), given language(s) and a determined period of time.

.....

NO

NO OPINION

2. Two rights involved in a single act of exploitation

Each act of transmission in digital networks entails (in the current state of technology and law) several reproductions. This means that there are two rights that apply to digital transmissions: the reproduction right and the making available right. This may complicate the licensing of works for online use notably when the two rights are held by different persons/entities.

10. [In particular if you a service provider or a right holder:] Does the application of two rights to a single act of economic exploitation in the online environment (e.g. a download) create problems for you?

²³ The objective of implementing a “country of origin” approach is to localise the copyright relevant act that must be licenced in a single Member State (the "country of origin", which could be for example the Member State in which the content is uploaded or where the service provider is established), regardless of in how many Member States the work can be accessed or received. Such an approach has already been introduced at EU level with regard to broadcasting by satellite (see Directive 93/83/EEC on the coordination of certain rules concerning copyright and rights related to copyright applicable to satellite broadcasting and cable retransmission).

²⁴ Injunctive relief is a temporary or permanent remedy allowing the right holder to stop or prevent an infringement of his/her right.

YES – Please explain what type of measures would be needed in order to address such problems (e.g. facilitation of joint licences when the rights are in different hands, legislation to achieve the "bundling of rights")

.....
.....

NO

NO OPINION

3. Linking and browsing

Hyperlinks are references to data that lead a user from one location in the Internet to another. They are indispensable for the functioning of the Internet as a network. Several cases are pending before the CJEU²⁵ in which the question has been raised whether the provision of a clickable link constitutes an act of communication to the public/making available to the public subject to the authorisation of the rightholder.

A user browsing the internet (e.g. viewing a web-page) regularly creates temporary copies of works and other subject-matter protected under copyright on the screen and in the 'cache' memory of his computer. A question has been referred to the CJEU²⁶ as to whether such copies are always covered by the mandatory exception for temporary acts of reproduction provided for in Article 5(1) of Directive 2001/29/EC.

11. Should the provision of a hyperlink leading to a work or other subject matter protected under copyright, either in general or under specific circumstances, be subject to the authorisation of the rightholder?

YES – Please explain whether you consider this to be the case in general, or under specific circumstances, and why

Europa Distribution: We think that a hyperlink to a film should of course be protected by the copyright and that authorization should be asked to the right holder. Otherwise it could lead to an act of piracy.

.....

NO – Please explain whether you consider this to be the case in general, or under specific circumstances, and why (e.g. because it does not amount to an act of communication to the public – or to a new public, or because it should be covered by a copyright exception)

.....
.....

NO OPINION

12. Should the viewing of a web-page where this implies the temporary reproduction of a work or other subject matter protected under copyright on the screen and in the cache

²⁵ Cases C-466/12 (Svensson), C-348/13 (Bestwater International) and C-279/13 (C More entertainment).

memory of the user's computer, either in general or under specific circumstances, be subject to the authorisation of the rightholder?

YES – Please explain whether you consider this to be the case in general, or under specific circumstances, and why

.....
.....

NO – Please explain whether you consider this to be the case in general, or under specific circumstances, and why (e.g. because it is or should be covered by a copyright exception)

.....
.....

NO OPINION

4. Download to own digital content

Digital content is increasingly being bought via digital transmission (e.g. download to own). Questions arise as to the possibility for users to dispose of the files they buy in this manner (e.g. by selling them or by giving them as a gift). The principle of EU exhaustion of the distribution right applies in the case of the distribution of physical copies (e.g. when a tangible article such as a CD or a book, etc. is sold, the right holder cannot prevent the further distribution of that tangible article)²⁷. The issue that arises here is whether this principle can also be applied in the case of an act of transmission equivalent in its effect to distribution (i.e. where the buyer acquires the property of the copy)²⁸. This raises difficult questions, notably relating to the practical application of such an approach (how to avoid re-sellers keeping and using a copy of a work after they have “re-sold” it – this is often referred to as the “forward and delete” question) as well as to the economic implications of the creation of a second-hand market of copies of perfect quality that never deteriorate (in contrast to the second-hand market for physical goods).

13. [In particular if you are an end user/consumer:] Have you faced restrictions when trying to resell digital files that you have purchased (e.g. mp3 file, e-book)?

YES – Please explain by giving examples

.....
.....

NO

NO OPINION

²⁷ See also recital 28 of Directive 2001/29/EC.

²⁸ In Case C-128/11 (Oracle vs. UsedSoft) the CJEU ruled that an author cannot oppose the resale of a second-hand licence that allows downloading his computer program from his website and using it for an unlimited period of time. The exclusive right of distribution of a copy of a computer program covered by such a licence is exhausted on its first sale. While it is thus admitted that the distribution right may be subject to exhaustion in case of computer programs offered for download with the right holder's consent, the Court was careful to emphasise that it reached this decision based on the Computer Programs Directive. It was stressed that this exhaustion rule constituted a *lex specialis* in relation to the Information Society Directive (UsedSoft, par. 51, 56).

14. [In particular if you are a right holder or a service provider:] What would be the consequences of providing a legal framework enabling the resale of previously purchased digital content? Please specify per market (type of content) concerned.

[Open question]

Europa Distribution: For the film industry, enabling the resale of previously purchased film could create a huge black market, with no rights paid to the rightholders and creators, what would put in danger creativity and access to cultural goods in their diversity. It is important that movies bought online remain only the property of the buyer. In a virtual world, the buyer won't be able to re-sell his copy, but also, he won't have paid at the same price what he would have paid for a dvd, as prices for DTO/EST are lower (because no physical material)

.....

C. Registration of works and other subject matter – is it a good idea?

Registration is not often discussed in copyright in the EU as the existing international treaties in the area prohibit formalities as a condition for the protection and exercise of rights. However, this prohibition is not absolute²⁹. Moreover a system of registration does not need to be made compulsory or constitute a precondition for the protection and exercise of rights. With a longer term of protection and with the increased opportunities that digital technology provides for the use of content (including older works and works that otherwise would not have been disseminated), the advantages and disadvantages of a system of registration are increasingly being considered³⁰.

15. Would the creation of a registration system at EU level help in the identification and licensing of works and other subject matter?

YES

NO

NO OPINION

16. What would be the possible advantages of such a system?

[Open question]

.....

.....

17. What would be the possible disadvantages of such a system?

[Open question]

.....

.....

²⁹ For example, it does not affect “domestic” works – i.e. works originating in the country imposing the formalities as opposed to works originating in another country.

³⁰ On the basis of Article 3.6 of the Directive 2012/28/EU of the European Parliament and of the Council of 25 October 2012 on certain permitted uses of orphan works, a publicly accessible online database is currently being set up by the Office for Harmonisation of the Internal Market (OHIM) for the registration of orphan works.

18. What incentives for registration by rightholders could be envisaged?

[Open question]

.....
.....

D. How to improve the use and interoperability of identifiers

There are many private databases of works and other subject matter held by producers, collective management organisations, and institutions such as libraries, which are based to a greater or lesser extent on the use of (more or less) interoperable, internationally agreed ‘identifiers’. Identifiers can be compared to a reference number embedded in a work, are specific to the sector in which they have been developed³¹, and identify, variously, the work itself, the owner or the contributor to a work or other subject matter. There are notable examples of where industry is undertaking actions to improve the interoperability of such identifiers and databases. The Global Repertoire Database³² should, once operational, provide a single source of information on the ownership and control of musical works worldwide. The Linked Content Coalition³³ was established to develop building blocks for the expression and management of rights and licensing across all content and media types. It includes the development of a Rights Reference Model (RRM) – a comprehensive data model for all types of rights in all types of content. The UK Copyright Hub³⁴ is seeking to take such identification systems a step further, and to create a linked platform, enabling automated licensing across different sectors.

19. What should be the role of the EU in promoting the adoption of identifiers in the content sector, and in promoting the development and interoperability of rights ownership and permissions databases?

[Open question]

.....
.....

E. Term of protection – is it appropriate?

Works and other subject matter are protected under copyright for a limited period of time. After the term of protection has expired, a work falls into the public domain and can be freely used by anyone (in accordance with the applicable national rules on moral rights). The Berne Convention³⁵ requires a minimum term of protection of 50 years after the death of the author. The EU rules extend this term of protection to 70 years after the death of the author (as do many other countries, e.g. the US).

³¹ E.g. the International Standard Recording Code (ISRC) is used to identify recordings, the International Standard Book Number (ISBN) is used to identify books.

³² You will find more information about this initiative on the following website: <http://www.globalrepertoiredatabase.com/>.

³³ You will find more information about this initiative (funded in part by the European Commission) on the following website: www.linkedcontentcoalition.org.

³⁴ You will find more information about this initiative on the following website: <http://www.copyrighthub.co.uk/>.

³⁵ Berne Convention for the Protection of Literary and Artistic Works, <http://www.wipo.int/treaties/en/ip/berne/>.

With regard to performers in the music sector and phonogram producers, the term provided for in the EU rules also extend 20 years beyond what is mandated in international agreements, providing for a term of protection of 70 years after the first publication. Performers and producers in the audio-visual sector, however, do not benefit from such an extended term of protection.

20. Are the current terms of copyright protection still appropriate in the digital environment?

YES – Please explain

.....
.....

NO – Please explain if they should be longer or shorter

.....
.....

NO OPINION

III. Limitations and exceptions in the Single Market

Limitations and exceptions to copyright and related rights enable the use of works and other protected subject-matter, without obtaining authorisation from the rightholders, for certain purposes and to a certain extent (for instance the use for illustration purposes of an extract from a novel by a teacher in a literature class). At EU level they are established in a number of copyright directives, most notably Directive 2001/29/EC³⁶.

Exceptions and limitations in the national and EU copyright laws have to respect international law³⁷. In accordance with international obligations, the EU acquis requires that limitations and exceptions can only be applied in certain special cases which do not conflict with a normal exploitation of the work or other subject matter and do not unreasonably prejudice the legitimate interest of the rightholders.

Whereas the catalogue of limitations and exceptions included in EU law is exhaustive (no other exceptions can be applied to the rights harmonised at EU level)³⁸, these limitations and exceptions are often optional³⁹, in the sense that Member States are free to reflect in national legislation as many or as few of them as they wish. Moreover, the formulation of certain of the limitations and exceptions is general enough to give significant flexibility to the Member States as to how, and to what extent, to implement them (if they decide to do so). Finally, it is worth noting that not all of the limitations and exceptions included in the EU legal framework for copyright are of equivalent significance in policy terms and in terms of their potential effect on the functioning of the Single Market.

³⁶ Plus Directive 96/9/EC on the legal protection of databases; Directive 2009/24/EC on the legal protection of computer programs, and Directive 92/100/EC on rental right and lending right.

³⁷ Article 9(2) of the Berne Convention for the Protection of Literary and Artistic Works (1971); Article 13 of the TRIPS Agreement (Trade Related Intellectual Property Rights) 1994; Article 16(2) of the WIPO Performers and Phonograms Treaty (1996); Article 9(2) of the WIPO Copyright Treaty (1996).

³⁸ Other than the grandfathering of the exceptions of minor importance for analogue uses existing in Member States at the time of adoption of Directive 2001/29/EC (see, Art. 5(3)(o)).

³⁹ With the exception of certain limitations: (i) in the Computer Programs Directive, (ii) in the Database Directive, (iii) Article 5(1) in the Directive 2001/29/EC and (iv) the Orphan Works Directive.

In addition, in the same manner that the definition of the rights is territorial (i.e. has an effect only within the territory of the Member State), the definition of the limitations and exceptions to the rights is territorial too (so an act that is covered by an exception in a Member State "A" may still require the authorisation of the rightholder once we move to the Member State "B")⁴⁰.

The cross-border effect of limitations and exceptions also raises the question of fair compensation of rightholders. In some instances, Member States are obliged to compensate rightholders for the harm inflicted on them by a limitation or exception to their rights. In other instances Member States are not obliged, but may decide, to provide for such compensation. If a limitation or exception triggering a mechanism of fair compensation were to be given cross-border effect (e.g. the books are used for illustration in an online course given by an university in a Member State "A" and the students are in a Member State "B") then there would also be a need to clarify which national law should determine the level of that compensation and who should pay it.

Finally, the question of flexibility and adaptability is being raised: what is the best mechanism to ensure that the EU and Member States' regulatory frameworks adapt when necessary (either to clarify that certain uses are covered by an exception or to confirm that for certain uses the authorisation of rightholders is required)? The main question here is whether a greater degree of flexibility can be introduced in the EU and Member States regulatory framework while ensuring the required legal certainty, including for the functioning of the Single Market, and respecting the EU's international obligations.

21. Are there problems arising from the fact that most limitations and exceptions provided in the EU copyright directives are optional for the Member States?

YES – Please explain by referring to specific cases

.....
.....

NO – Please explain

Europa Distribution: At the contrary, flexibility is essential to adapt those exceptions to the reality of each territory.

.....

NO OPINION

22. Should some/all of the exceptions be made mandatory and, if so, is there a need for a higher level of harmonisation of such exceptions?

YES – Please explain by referring to specific cases

.....
.....

NO – Please explain

⁴⁰ Only the exception established in the recent Orphan Works Directive (a mandatory exception to copyright and related rights in the case where the rightholders are not known or cannot be located) has been given a cross-border effect, which means that, for instance, once a literary work – for instance a novel – is considered an orphan work in a Member State, that same novel shall be considered an orphan work in all Member States and can be used and accessed in all Member States.

23. Should any new limitations and exceptions be added to or removed from the existing catalogue? Please explain by referring to specific cases.

[Open question]

Europa Distribution: regarding the screenings of film at school, only the screening of excerpts should be free of rights. All schools should pay rights to screen an entire film. Some distributors are working essentially on films for the young public and therefore they are making those films exist on their territory. To enable them to continue their work, it is from utmost importance they perceive rights on school screenings too.

24. Independently from the questions above, is there a need to provide for a greater degree of flexibility in the EU regulatory framework for limitations and exceptions?

YES – Please explain why

NO – Please explain why

NO OPINION

25. If yes, what would be the best approach to provide for flexibility? (e.g. interpretation by national courts and the ECJ, periodic revisions of the directives, interpretations by the Commission, built-in flexibility, e.g. in the form of a fair-use or fair dealing provision / open norm, etc.)? Please explain indicating what would be the relative advantages and disadvantages of such an approach as well as its possible effects on the functioning of the Internal Market.

[Open question]

26. Does the territoriality of limitations and exceptions, in your experience, constitute a problem?

YES – Please explain why and specify which exceptions you are referring to

NO – Please explain why and specify which exceptions you are referring to

.....
NO OPINION

27. *In the event that limitations and exceptions established at national level were to have cross-border effect, how should the question of “fair compensation” be addressed, when such compensation is part of the exception? (e.g. who pays whom, where?)*

[Open question]
.....
.....

A. *Access to content in libraries and archives*

Directive 2001/29/EC enables Member States to reflect in their national law a range of limitations and exceptions for the benefit of publicly accessible libraries, educational establishments and museums, as well as archives. If implemented, these exceptions allow acts of preservation and archiving⁴¹ and enable on-site consultation of the works and other subject matter in the collections of such institutions⁴². The public lending (under an exception or limitation) by these establishments of physical copies of works and other subject matter is governed by the Rental and Lending Directive⁴³.

Questions arise as to whether the current framework continues to achieve the objectives envisaged or whether it needs to be clarified or updated to cover use in digital networks. At the same time, questions arise as to the effect of such a possible expansion on the normal exploitation of works and other subject matter and as to the prejudice this may cause to rightholders. The role of licensing and possible framework agreements between different stakeholders also needs to be considered here.

1. *Preservation and archiving*

The preservation of the copies of works or other subject-matter held in the collections of cultural establishments (e.g. books, records, or films) – the restoration or replacement of works, the copying of fragile works - may involve the creation of another copy/ies of these works or other subject matter. Most Member States provide for an exception in their national laws allowing for the making of such preservation copies. The scope of the exception differs from Member State to Member State (as regards the type of beneficiary establishments, the types of works/subject-matter covered by the exception, the mode of copying and the number of reproductions that a beneficiary establishment may make). Also, the current legal status of new types of preservation activities (e.g. harvesting and archiving publicly available web content) is often uncertain.

28. (a) *[In particular if you are an institutional user:] Have you experienced specific problems when trying to use an exception to preserve and archive specific works or other subject matter in your collection?*

(b) *[In particular if you are a right holder:] Have you experienced problems with the use by libraries, educational establishments, museum or archives of the preservation exception?*

⁴¹ Article 5(2)c of Directive 2001/29.

⁴² Article 5(3)n of Directive 2001/29.

⁴³ Article 5 of Directive 2006/115/EC.

YES – Please explain, by Member State, sector, and the type of use in question.

NO

NO OPINION

29. If there are problems, how would they best be solved?

[Open question]

Europa Distribution: The main problem is the preservation of the catalogues. Film Heritage Institutions should be supported in their task to do so

30. If your view is that a legislative solution is needed, what would be its main elements? Which activities of the beneficiary institutions should be covered and under which conditions?

[Open question]

31. If your view is that a different solution is needed, what would it be?

[Open question]

2. Off-premises access to library collections

Directive 2001/29/EC provides an exception for the consultation of works and other subject-matter (consulting an e-book, watching a documentary) via dedicated terminals on the premises of such establishments for the purpose of research and private study. The online consultation of works and other subject-matter remotely (i.e. when the library user is not on the premises of the library) requires authorisation and is generally addressed in agreements between universities/libraries and publishers. Some argue that the law rather than agreements should provide for the possibility to, and the conditions for, granting online access to collections.

32. (a) [In particular if you are an institutional user:] Have you experienced specific problems when trying to negotiate agreements with rights holders that enable you to provide remote access, including across borders, to your collections (or parts thereof) for purposes of research and private study?

(b) [In particular if you are an end user/consumer:] Have you experienced specific problems when trying to consult, including across borders, works and other subject-matter held in

the collections of institutions such as universities and national libraries when you are not on the premises of the institutions in question?

(c) [In particular if you are a right holder:] Have you negotiated agreements with institutional users that enable those institutions to provide remote access, including across borders, to the works or other subject-matter in their collections, for purposes of research and private study?

[Open question]

.....
.....

33. *If there are problems, how would they best be solved?*

[Open question]

.....
.....

34. *If your view is that a legislative solution is needed, what would be its main elements? Which activities of the beneficiary institutions should be covered and under which conditions?*

[Open question]

.....
.....

35. *If your view is that a different solution is needed, what would it be?*

[Open question]

Europa Distribution: We believe that the online consultation of a movie can only be granted by his right holder. An agreement is sufficient, a law is not needed

.....

3. E – lending

Traditionally, public libraries have loaned physical copies of works (i.e. books, sometimes also CDs and DVDs) to their users. Recent technological developments have made it technically possible for libraries to provide users with temporary access to digital content, such as e-books, music or films via networks. Under the current legal framework, libraries need to obtain the authorisation of the rights holders to organise such e-lending activities. In various Member States, publishers and libraries are currently experimenting with different business models for the making available of works online, including direct supply of e-books to libraries by publishers or bundling by aggregators.

36. (a) [In particular if you are a library:] Have you experienced specific problems when trying to negotiate agreements to enable the electronic lending (e-lending), including across borders, of books or other materials held in your collection?

(b) [In particular if you are an end user/consumer:] Have you experienced specific problems when trying to borrow books or other materials electronically (e-lending), including across borders, from institutions such as public libraries?

(c) [In particular if you are a right holder:] Have you negotiated agreements with libraries to enable them to lend books or other materials electronically, including across borders?

YES – Please explain with specific examples

.....
.....

NO

NO OPINION

37. If there are problems, how would they best be solved?

[Open question]

Europa Distribution: To avoid problems for the right holders (distributor or other), it is important that libraries, as other online content provider, should receive an authorization from the right holder to show the film, on a certain territory and a certain language

To make the content available also electronically should not be a problem for the distributor, if the access is granted only to the consumer who would have bought the physical copy (DVD) anyway.

The electronic access of such a content should then be non-transferrable, for a determined period of time and linked to a library subscription number. Nowadays, technology allows this very easily

.....
.....

The following two questions are relevant both to this point (n° 3) and the previous one (n° 2).

38. [In particular if you are an institutional user:] What differences do you see in the management of physical and online collections, including providing access to your subscribers? What problems have you encountered?

[Open question]

.....
.....

39. [In particular if you are a right holder:] What difference do you see between libraries' traditional activities such as on-premises consultation or public lending and activities such as off-premises (online, at a distance) consultation and e-lending? What problems have you encountered?

[Open question]

Europa Distribution: As long as the off-premises consultation right is granted only to one user, as it is with the on-premises consultation, there is no big difference. However, the e-lending should also be limited in time (as it is with the on-premises), otherwise this could lead

to a form of acquisition by the end user, whereas they have not paid for this. In the same way, it could enable the library subscriber to transfer its e-lending access to anyone, simply by giving its subscription codes to several persons, which would create a parallel form of diffusion, harming for the cinema industry.....

4. Mass digitisation

The term “mass digitisation” is normally used to refer to efforts by institutions such as libraries and archives to digitise (e.g. scan) the entire content or part of their collections with an objective to preserve these collections and, normally, to make them available to the public. Examples are efforts by libraries to digitise novels from the early part of the 20th century or whole collections of pictures of historical value. This matter has been partly addressed at the EU level by the 2011 Memorandum of Understanding (MoU) on key principles on the digitisation and making available of out of commerce works (i.e. works which are no longer found in the normal channels of commerce), which is aiming to facilitate mass digitisation efforts (for books and learned journals) on the basis of licence agreements between libraries and similar cultural institutions on the one hand and the collecting societies representing authors and publishers on the other⁴⁴. Provided the required funding is ensured (digitisation projects are extremely expensive), the result of this MoU should be that books that are currently to be found only in the archives of, for instance, libraries will be digitised and made available online to everyone. The MoU is based on voluntary licences (granted by Collective Management Organisations on the basis of the mandates they receive from authors and publishers). Some Member States may need to enact legislation to ensure the largest possible effect of such licences (e.g. by establishing in legislation a presumption of representation of a collecting society or the recognition of an “extended effect” to the licences granted)⁴⁵.

40. *[In particular if you are an institutional user, engaging or wanting to engage in mass digitisation projects, a right holder, a collective management organisation:] Would it be necessary in your country to enact legislation to ensure that the results of the 2011 MoU (i.e. the agreements concluded between libraries and collecting societies) have a cross-border effect so that out of commerce works can be accessed across the EU?*

YES – Please explain why and how it could best be achieved

.....
.....

NO – Please explain

.....
.....

NO OPINION

⁴⁴ You will find more information about his MoU on the following website: http://ec.europa.eu/internal_market/copyright/out-of-commerce/index_en.htm.

⁴⁵ France and Germany have already adopted legislation to back the effects of the MoU. The French act (LOI n° 2012-287 du 1er mars 2012 relative à l'exploitation numérique des livres indisponibles du xxe siècle) foresees collective management, unless the author or publisher in question opposes such management. The German act (Gesetz zur Nutzung verwaister und vergriffener Werke und einer weiteren Änderung des Urheberrechtsgesetzes vom 1. Oktober 2013) contains a legal presumption of representation by a collecting society in relation to works whose rightholders are not members of the collecting society.

41. Would it be necessary to develop mechanisms, beyond those already agreed for other types of content (e.g. for audio- or audio-visual collections, broadcasters' archives)?

YES – Please explain

.....
.....

NO – Please explain

.....
.....

NO OPINION

B. Teaching

Directive 2001/29/EC⁴⁶ enables Member States to implement in their national legislation limitations and exceptions for the purpose of illustration for non-commercial teaching. Such exceptions would typically allow a teacher to use parts of or full works to illustrate his course, e.g. by distributing copies of fragments of a book or of newspaper articles in the classroom or by showing protected content on a smart board without having to obtain authorisation from the right holders. The open formulation of this (optional) provision allows for rather different implementation at Member States level. The implementation of the exception differs from Member State to Member State, with several Member States providing instead a framework for the licensing of content for certain educational uses. Some argue that the law should provide for better possibilities for distance learning and study at home.

42. (a) [In particular if you are an end user/consumer or an institutional user:] Have you experienced specific problems when trying to use works or other subject-matter for illustration for teaching, including across borders?

(b) [In particular if you are a right holder:] Have you experienced specific problems resulting from the way in which works or other subject-matter are used for illustration for teaching, including across borders?

YES – Please explain

Europa Distribution: We have no problem if a teacher is using only fragments of a movie to illustrate his course, but we do have one when it is a full film that is used.

There is often a distributor who worked to make that film exist on his territory and put energy, knowhow, experience and money to do so. It is not fair that his work would not be rewarded because the whole film would be shown in a school for free. To watch a film in its entirety, a school should pay a fee to the right holder.

Furthermore, we strongly believe that a film should be seen in a theatre, and again, a lot of initiative exist that encourage film literacy AND the use of a film to illustrate a lesson.

Making film available for free will just reduce all those efforts to nothing and teach our children to see a film for free on a small screen. This goes totally against the preoccupation to reach young audience and bring it to the theatres.

NO

⁴⁶ Article 5(3)a of Directive 2001/29.

NO OPINION

43. *If there are problems, how would they best be solved?*

[Open question]

Europa Distribution:

Governments should support financially their schools so that they would have access to movies, and could pay for the rights. They could also support the creation of associations organizing screening with films with pedagogical value, in the theatres, to show young audiences that a film should be seen on a big screen, in a theatre (and not only for free on a computer, as lot of the young generation think it is).

Education to the film consumption and film literacy are important keys.

44. *What mechanisms exist in the market place to facilitate the use of content for illustration for teaching purposes? How successful are they?*

[Open question]

Europa Distribution: Regarding the screenings of films in theatres at the attention of schools, organizations such as Les Grignoux or Lessen in het Donker (Belgium) do a very important job. They create pedagogical files around a movie and its thematic, that a teacher can use in class as support to the film seen with the pupils in a theatre.

This kind of initiatives educates young audience to go to the theatres, have interest and respect in films, creators and the people making it possible and have an huge pedagogical impact.....

.....

45. *If your view is that a legislative solution is needed, what would be its main elements? Which activities of the beneficiary institutions should be covered and under what conditions?*

[Open question]

.....

.....

46. *If your view is that a different solution is needed, what would it be?*

[Open question]

Europa Distribution: As said above, regarding films, the solution would be to encourage teachers to go to the cinema with their students so that they can work together, on the basis of a movie.

.....

.....

C. Research

Directive 2001/29/EC⁴⁷ enables Member States to choose whether to implement in their national laws a limitation for the purpose of non-commercial scientific research. The open formulation of this (optional) provision allows for rather different implementations at Member States level.

47. (a) [In particular if you are an end user/consumer or an institutional user:] Have you experienced specific problems when trying to use works or other subject matter in the context of research projects/activities, including across borders?

(b) [In particular if you are a right holder:] Have you experienced specific problems resulting from the way in which works or other subject-matter are used in the context of research projects/activities, including across borders?

YES – Please explain

.....
.....

NO

NO OPINION

48. If there are problems, how would they best be solved?

[Open question]

.....
.....

49. What mechanisms exist in the Member States to facilitate the use of content for research purposes? How successful are they?

[Open question]

.....
.....

D. Disabilities

Directive 2001/29/EC⁴⁸ provides for an exception/limitation for the benefit of people with a disability. The open formulation of this (optional) provision allows for rather different implementations at Member States level. At EU and international level projects have been launched to increase the accessibility of works and other subject-matter for persons with disabilities (notably by increasing the number of works published in special formats and facilitating their distribution across the European Union)⁴⁹.

⁴⁷ Article 5(3)a of Directive 2001/29.

⁴⁸ Article 5 (3)b of Directive 2001/29.

⁴⁹ The European Trusted Intermediaries Network (ETIN) resulting from a Memorandum of Understanding between representatives of the right-holder community (publishers, authors, collecting societies) and interested parties such as associations for blind and dyslexic persons

The Marrakesh Treaty⁵⁰ has been adopted to facilitate access to published works for persons who are blind, visually impaired, or otherwise print disabled. The Treaty creates a mandatory exception to copyright that allows organisations for the blind to produce, distribute and make available accessible format copies to visually impaired persons without the authorisation of the rightholders. The EU and its Member States have started work to sign and ratify the Treaty. This may require the adoption of certain provisions at EU level (e.g. to ensure the possibility to exchange accessible format copies across borders).

50. (a) [In particular if you are a person with a disability or an organisation representing persons with disabilities:] Have you experienced problems with accessibility to content, including across borders, arising from Member States' implementation of this exception?

(b) [In particular if you are an organisation providing services for persons with disabilities:] Have you experienced problems when distributing/communicating works published in special formats across the EU?

(c) [In particular if you are a right holder:] Have you experienced specific problems resulting from the application of limitations or exceptions allowing for the distribution/communication of works published in special formats, including across borders?

YES – Please explain by giving examples

.....
.....

NO

Europa Distribution: As long as the production costs of such special formats are not supported by distributors/sales agents, and if these special formats only have to be done after request by organisations for people with disability, but is not compulsory for all the works, it is not a problem.

Such initiatives already exist, as putting the audio-description on the dvd of a title, after an agreement between a distributor and a local organisation.

NO OPINION

51. If there are problems, what could be done to improve accessibility?

[Open question]

.....
.....

52. What mechanisms exist in the market place to facilitate accessibility to content? How successful are they?

(http://ec.europa.eu/internal_market/copyright/initiatives/access/index_en.htm) and the Trusted Intermediary Global Accessible Resources (TIGAR) project in WIPO (<http://www.visionip.org/portal/en/>).

⁵⁰ Marrakesh Treaty to Facilitate Access to Published Works by Visually Impaired Persons and Persons with Print Disabilities, Marrakesh, June 17 to 28 2013.

[Open question]

Europa Distribution: there are associations and festivals that organise screenings for the visually impaired.

.....

E. Text and data mining

Text and data mining/content mining/data analytics⁵¹ are different terms used to describe increasingly important techniques used in particular by researchers for the exploration of vast amounts of existing texts and data (e.g., journals, web sites, databases etc.). Through the use of software or other automated processes, an analysis is made of relevant texts and data in order to obtain new insights, patterns and trends.

The texts and data used for mining are either freely accessible on the internet or accessible through subscriptions to e.g. journals and periodicals that give access to the databases of publishers. A copy is made of the relevant texts and data (e.g. on browser cache memories or in computers RAM memories or onto the hard disk of a computer), prior to the actual analysis. Normally, it is considered that to mine protected works or other subject matter, it is necessary to obtain authorisation from the right holders for the making of such copies unless such authorisation can be implied (e.g. content accessible to general public without restrictions on the internet, open access).

Some argue that the copies required for text and data mining are covered by the exception for temporary copies in Article 5.1 of Directive 2001/29/EC. Others consider that text and data mining activities should not even be seen as covered by copyright. None of this is clear, in particular since text and data mining does not consist only of a single method, but can be undertaken in several different ways. Important questions also remain as to whether the main problems arising in relation to this issue go beyond copyright (i.e. beyond the necessity or not to obtain the authorisation to use content) and relate rather to the need to obtain “access” to content (i.e. being able to use e.g. commercial databases).

A specific Working Group was set up on this issue in the framework of the "Licences for Europe" stakeholder dialogue. No consensus was reached among participating stakeholders on either the problems to be addressed or the results. At the same time, practical solutions to facilitate text and data mining of subscription-based scientific content were presented by publishers as an outcome of “Licences for Europe”⁵². In the context of these discussions, other stakeholders argued that no additional licences should be required to mine material to which access has been provided through a subscription agreement and considered that a specific exception for text and data mining should be introduced, possibly on the basis of a distinction between commercial and non-commercial.

53. (a) [In particular if you are an end user/consumer or an institutional user:] Have you experienced obstacles, linked to copyright, when trying to use text or data mining methods, including across borders?

⁵¹ For the purpose of the present document, the term “text and data mining” will be used.

⁵² See the document “Licences for Europe – ten pledges to bring more content online”:
http://ec.europa.eu/internal_market/copyright/docs/licences-for-europe/131113_ten-pledges_en.pdf.

(b) [In particular if you are a service provider:] Have you experienced obstacles, linked to copyright, when providing services based on text or data mining methods, including across borders?

(c) [In particular if you are a right holder:] Have you experienced specific problems resulting from the use of text and data mining in relation to copyright protected content, including across borders?

YES – Please explain

.....
.....

NO – Please explain

.....
.....

NO OPINION

54. If there are problems, how would they best be solved?

.....

56. If your view is that a different solution is needed, what would it be?

[Open question]

.....
.....

57. Are there other issues, unrelated to copyright, that constitute barriers to the use of text or data mining methods?

[Open question]

.....
.....

F. User-generated content

Technological and service developments mean that citizens can copy, use and distribute content at little to no financial cost. As a consequence, new types of online activities are

developing rapidly, including the making of so-called “user-generated content”. While users can create totally original content, they can also take one or several pre-existing works, change something in the work(s), and upload the result on the Internet e.g. to platforms and blogs⁵³. User-generated content (UGC) can thus cover the modification of pre-existing works even if the newly-generated/"uploaded" work does not necessarily require a creative effort and results from merely adding, subtracting or associating some pre-existing content with other pre-existing content. This kind of activity is not “new” as such. However, the development of social networking and social media sites that enable users to share content widely has vastly changed the scale of such activities and increased the potential economic impact for those holding rights in the pre-existing works. Re-use is no longer the preserve of a technically and artistically adept elite. With the possibilities offered by the new technologies, re-use is open to all, at no cost. This in turn raises questions with regard to fundamental rights such the freedom of expression and the right to property.

A specific Working Group was set up on this issue in the framework of the "Licences for Europe" stakeholder dialogue. No consensus was reached among participating stakeholders on either the problems to be addressed or the results or even the definition of UGC. Nevertheless, a wide range of views were presented as to the best way to respond to this phenomenon. One view was to say that a new exception is needed to cover UGC, in particular non-commercial activities by individuals such as combining existing musical works with videos, sequences of photos, etc. Another view was that no legislative change is needed: UGC is flourishing, and licensing schemes are increasingly available (licence schemes concluded between rightholders and platforms as well as micro-licences concluded between rightholders and the users generating the content. In any event, practical solutions to ease user-generated content and facilitate micro-licensing for small users were pledged by rightholders across different sectors as a result of the “Licences for Europe” discussions⁵⁴.

58. (a) [In particular if you are an end user/consumer:] Have you experienced problems when trying to use pre-existing works or other subject matter to disseminate new content on the Internet, including across borders?

(b) [In particular if you are a service provider:] Have you experienced problems when users publish/disseminate new content based on the pre-existing works or other subject-matter through your service, including across borders?

(c) [In particular if you are a right holder:] Have you experienced problems resulting from the way the users are using pre-existing works or other subject-matter to disseminate new content on the Internet, including across borders?

YES – Please explain by giving examples

Europa Distribution: Regarding film distribution, this could be a problem if someone is using part of a film to create a new content - may this content give a positive or a negative view on the film. Today when a television programme for example uses a fragment of a film to illustrate a subject, the right holder may ask for a fee for this use. Giving access for free to fragments because online would jeopardize this.

Furthermore, this could be considered as piracy.

⁵³ A typical example could be the “kitchen” or “wedding” video (adding one's own video to a pre-existing sound recording), or adding one's own text to a pre-existing photograph. Other examples are “mash-ups” (blending two sound recordings), and reproducing parts of journalistic work (report, review etc.) in a blog.

⁵⁴ See the document “Licences for Europe – ten pledges to bring more content online”:

http://ec.europa.eu/internal_market/copyright/docs/licences-for-europe/131113_ten-pledges_en.pdf.

NO

NO OPINION

59. (a) [In particular if you are an end user/consumer or a right holder:] Have you experienced problems when trying to ensure that the work you have created (on the basis of pre-existing works) is properly identified for online use? Are proprietary systems sufficient in this context?

(b) [In particular if you are a service provider:] Do you provide possibilities for users that are publishing/disseminating the works they have created (on the basis of pre-existing works) through your service to properly identify these works for online use?

YES – Please explain

.....

.....

NO OPINION

61. If there are problems, how would they best be solved?

[Open question]

Europa Distribution: As said earlier, it is important that in this case, the same rules are applied to linear and non linear content.

.....
.....

62. If your view is that a legislative solution is needed, what would be its main elements? Which activities should be covered and under what conditions?

[Open question]

.....
.....

63. If your view is that a different solution is needed, what would it be?

[Open question]

Europa Distribution: As in the linear world, permission should be asked to the right holder of the film that the consumer would use to generate his own content.

IV. Private copying and reprography

Directive 2001/29/EC enables Member States to implement in their national legislation exceptions or limitations to the reproduction right for copies made for private use and photocopying⁵⁵. Levies are charges imposed at national level on goods typically used for such purposes (blank media, recording equipment, photocopying machines, mobile listening devices such as mp3/mp4 players, computers, etc.) with a view to compensating rightholders for the harm they suffer when copies are made without their authorisation by certain categories of persons (i.e. natural persons making copies for their private use) or through use of certain technique (i.e. reprography). In that context, levies are important for rightholders.

With the constant developments in digital technology, the question arises as to whether the copying of files by consumers/end-users who have purchased content online - e.g. when a person has bought an MP3 file and goes on to store multiple copies of that file (in her computer, her tablet and her mobile phone) - also triggers, or should trigger, the application of private copying levies. It is argued that, in some cases, these levies may indeed be claimed by rightholders whether or not the licence fee paid by the service provider already covers copies made by the end user. This approach could potentially lead to instances of double payments whereby levies could be claimed on top of service providers' licence fees⁵⁶⁵⁷.

There is also an on-going discussion as to the application or not of levies to certain types of cloud-based services such as personal lockers or personal video recorders.

64. In your view, is there a need to clarify at the EU level the scope and application of the private copying and reprography exceptions⁵⁸ in the digital environment?

YES – Please explain

.....

⁵⁵ Article 5. 2)(a) and (b) of Directive 2001/29.

⁵⁶ Communication "Unleashing the Potential of Cloud Computing in Europe", COM(2012) 529 final.

⁵⁷ These issues were addressed in the recommendations of Mr António Vitorino resulting from the mediation on private copying and reprography levies. You can consult these recommendations on the following website: http://ec.europa.eu/internal_market/copyright/docs/levy_reform/130131_levies-vitorino-recommendations_en.pdf.

⁵⁸ Art. 5.2(a) and 5.2(b) of Directive 2001/29/EC.

NO OPINION

⁵⁹ This issue was also addressed in the recommendations of Mr Antonio Vitorino resulting from the mediation on private copying and reprography levies

⁶⁰ This issue was also addressed in the recommendations of Mr Antonio Vitorino resulting from the mediation on private copying and reprography levies.

Diverging national systems levy different products and apply different tariffs. This results in obstacles to the free circulation of goods and services in the Single Market. At the same time, many Member States continue to allow the indiscriminate application of private copying levies to all transactions irrespective of the person to whom the product subject to a levy is sold (e.g. private person or business). In that context, not all Member States have ex ante exemption and/or ex post reimbursement schemes which could remedy these situations and reduce the number of undue payments⁶¹.

68. Have you experienced a situation where a cross-border transaction resulted in undue levy payments, or duplicate payments of the same levy, or other obstacles to the free movement of goods or services?

YES – Please specify the type of transaction and indicate the percentage of the undue payments. Please also indicate how a priori exemption and/or ex post reimbursement schemes could help to remedy the situation.

.....
.....

NO – Please explain

.....
.....

NO OPINION

69. What percentage of products subject to a levy is sold to persons other than natural persons for purposes clearly unrelated to private copying? Do any of those transactions result in undue payments? Please explain in detail the example you provide (type of products, type of transaction, stakeholders, etc.).

[Open question]

.....
.....

70. Where such undue payments arise, what percentage of trade do they affect? To what extent could a priori exemptions and/or ex post reimbursement schemes existing in some Member States help to remedy the situation?

[Open question]

.....
.....

71. If you have identified specific problems with the current functioning of the levy system, how would these problems best be solved?

[Open question]

⁶¹ This issue was also addressed in the recommendations of Mr Antonio Vitorino resulting from the mediation on private copying and reprography levies.

V. Fair remuneration of authors and performers

The EU copyright acquis recognises for authors and performers a number of exclusive rights and, in the case of performers whose performances are fixed in phonograms, remuneration rights. There are few provisions in the EU copyright law governing the *transfer* of rights from authors or performers to producers⁶² or determining who the owner of the rights is when the work or other subject matter is created in the context of an employment contract⁶³. This is an area that has been traditionally left for Member States to regulate and there are significant differences in regulatory approaches. Substantial differences also exist between different sectors of the creative industries.

Concerns continue to be raised that authors and performers are not adequately remunerated, in particular but not solely, as regards online exploitation. Many consider that the economic benefit of new forms of exploitation is not being fairly shared along the whole value chain. Another commonly raised issue concerns contractual practices, negotiation mechanisms, presumptions of transfer of rights, buy-out clauses and the lack of possibility to terminate contracts. Some stakeholders are of the opinion that rules at national level do not suffice to improve their situation and that action at EU level is necessary.

72. [In particular if you are an author/performer:] What is the best mechanism (or combination of mechanisms) to ensure that you receive an adequate remuneration for the exploitation of your works and performances?

[Open question]

.....
.....

73. Is there a need to act at the EU level (for instance to prohibit certain clauses in contracts)?

YES – Please explain

.....
.....

NO – Please explain why

.....
.....

NO OPINION

74. If you consider that the current rules are not effective, what would you suggest to address the shortcomings you identify?

[Open question]

⁶² See e.g. Directive 92/100/EEC, Art.2(4)-(7).

⁶³ See e.g. Art. 2.3. of Directive 2009/24/EC, Art. 4 of Directive 96/9/EC.

Europa Distribution: We believe that authors and performers should have a fair remuneration for their works and that regarding movies, it should be a negotiation between them and their producers. In an ideal world, remuneration of authors should then be covered by the producer only, for all supports of exploitation, and a distributor would exploit a film in the name of the producer, without paying anything on the top of the rights he paid to distribute the film in the first place.

VI. Respect for rights

Directive 2004/48/EE⁶⁴ provides for a harmonised framework for the civil enforcement of intellectual property rights, including copyright and related rights. The Commission has consulted broadly on this text⁶⁵. Concerns have been raised as to whether some of its provisions are still fit to ensure a proper respect for copyright in the digital age. On the one hand, the current measures seem to be insufficient to deal with the new challenges brought by the dissemination of digital content on the internet; on the other hand, there are concerns about the current balance between enforcement of copyright and the protection of fundamental rights, in particular the right for a private life and data protection. While it cannot be contested that enforcement measures should always be available in case of infringement of copyright, measures could be proposed to strengthen respect for copyright when the infringed content is used for a commercial purpose⁶⁶. One means to do this could be to clarify the role of intermediaries in the IP infrastructure⁶⁷. At the same time, there could be clarification of the safeguards for respect of private life and data protection for private users.

75. *Should the civil enforcement system in the EU be rendered more efficient for infringements of copyright committed with a commercial purpose?*

YES – Please explain

Europa Distribution: Considering that piracy is a great threat endangering both European culture and economy, we feel that the civil enforcement system in the EU could and should be rendered more efficient for infringements of copyright committed with a commercial purpose.

We see two different kind of piracy.

The most harmful one is organised and in some cases even made for lucrative purposes. Indeed, a lot of websites actually make consumers pay for illegal content and these should be fought in priority. Legal measures should be taken to remove illegal content and punish this illegal parallel industry (some having even criminal links).

The second one is made by a private consumer. Consumers have to understand that films are goods that have a value and imply the work of a lot of people. It is not because they have paid (sometimes a very high price) for their device that they should get the content for free.

Also, surveys have shown that the first reason why people download illegal content is not because it's free, but because it is more convenient: it is therefore important to put efforts in

⁶⁴ Directive 2004/48/EC of the European Parliament and of the Council of 29 April 2004 on the enforcement of intellectual property rights.

⁶⁵ You will find more information on the following website:

http://ec.europa.eu/internal_market/iprenforcement/directive/index_en.htm

⁶⁶ For example when the infringing content is offered on a website which gets advertising revenues that depend on the volume of traffic.

⁶⁷ This clarification should not affect the liability regime of intermediary service providers established by Directive 2000/31/EC on electronic commerce, which will remain unchanged.

pushing legal offer and make it easier to find. There are already inspiring initiatives in some European countries, aiming at guiding the consumer towards legal website and legal content.

In consequence, we believe that there is a long term work to do through education to raise awareness.

This awareness could flourish by integrating cinema to school programmes, so that pupils could learn about and from films, through European movies. They could also learn more about the cultural industries, with professionals from the branch explaining what they do (and by this we don't mean of course the front liners and superstars of the system). We believe that this would help to build an audience interested in cultural goods, conscious of their value and respecting them, even online.

NO – Please explain

.....

NO OPINION

VII. A single EU Copyright Title

The idea of establishing a unified EU Copyright Title has been present in the copyright debate for quite some time now, although views as to the merits and the feasibility of such an objective are divided. A unified EU Copyright Title would totally harmonise the area of copyright law in the EU and replace national laws. There would then be a single EU title

instead of a bundle of national rights. Some see this as the only manner in which a truly Single Market for content protected by copyright can be ensured, while others believe that the same objective can better be achieved by establishing a higher level of harmonisation while allowing for a certain degree of flexibility and specificity in Member States' legal systems.

78. Should the EU pursue the establishment of a single EU Copyright Title, as a means of establishing a consistent framework for rights and exceptions to copyright across the EU, as well as a single framework for enforcement?

- YES
- NO
- NO OPINION

79. Should this be the next step in the development of copyright in the EU? Does the current level of difference among the Member State legislation mean that this is a longer term project?

[Open question]

.....
.....

VIII. Other issues

The above questionnaire aims to provide a comprehensive consultation on the most important matters relating to the current EU legal framework for copyright. Should any important matters have been omitted, we would appreciate if you could bring them to our attention, so they can be properly addressed in the future.

80. Are there any other important matters related to the EU legal framework for copyright? Please explain and indicate how such matters should be addressed.

[Open question]
